SPACE COUNTER PORTS
                                            You have been given the task of making the content on a social media platform more user-friendly. Your task is to find and return an integer value
                                            representing the count of the number of spaces in a given string S.
                                           Input:
                                            A string S
  OAAKUB
                                            Output:
                                            Return an integer value representing the count of the number of spaces in a given string S.
                                           Example:
                                           Input:
                                           Hello World Hey
                                            Output:
                                           2
                                                                                                                                                                                                                                                                                                                                                                                                                                                                   AA KUB.
